

Plexxikon

## Gary C. Visor, Ph.D.

Vice President, Pharmaceuticals

Dr. Visor joined Plexxikon in April 2007, responsible for managing pharmaceutical drug substance scale-up and manufacturing as well as dosage form design and development. He has more than 20 years of pharmaceutical and biotechnology manufacturing experience in process development, pharmaceutical operations, formulation and quality assurance. Prior to Plexxikon, he served as vice president, pharmaceutical research and process development and vice president of technical operations for OSI Pharmaceuticals where he was responsible for bulk API and drug product operations supporting oncology, metabolic and ophthalmology businesses. Previously, Dr. Visor held a variety of senior operations and development positions at leading biopharmaceutical companies including Cardinal Health, CellGate, Intermune, Roche Bioscience, Gilead Sciences, and Syntex Research. Dr. Visor received his Ph.D. in medicinal chemistry and pharmaceutical sciences from the University of Florida.
